Qualmark Corporation Files Form 15 with SEC; invests in Customer Service

(May 13, 2008) – Denver, Colorado – QualMark Corporation, a world leader in designing, manufacturing and marketing HALT (Highly Accelerated Life Testing), HASS (Highly Accelerated Stress Screening) and Electro-Dynamic vibration systems, today announced that it has filed Form 15 with the SEC to voluntarily suspend its SEC reporting obligations. The Company had announced on April 23 that its Board of Directors unanimously adopted a resolution to terminate the registration of its common stock under the Securities Exchange Act of 1934.

Why did the Company take this action?

The Company determined that this action was in the best interest of shareholders to create long term value and provide immediate benefit to its customers. Among the factors that led to this decision:

1. The substantial costs that Qualmark incurs to comply with the Securities Exchange Act, including Section 404 of the Sarbanes-Oxley Act. According to published data⁽¹⁾, costs for companies with revenues of \$25 Million to \$99 Million spend, on average, \$740,000 and 3,080 company hours annually on Sarbanes-Oxley compliance.
2. The lack of analyst coverage and minimal liquidity for the Company's stock;
3. The resources needed to maintain compliance could be re-directed towards valuable business activities, such as increasing customer service activities, developing new products, and finding new markets for the Company's products.

The Company intends to maintain auditable financial information that can be used if, in the future, the Company elects to re-register its shares, make an acquisition, or sell or merge the Company.

What does this mean for Qualmark Customers?

Because of the material cost and resource savings the Company realizes by deregistering its shares, the Company will be better able to increase the amount it spends on customer service and product development thereby better serving its large and growing customer base. And, as previously announced, the Company has considerable sales momentum as indicated by:

1. Last Reported Revenues – A Record!

As announced March 12, the Company's 2007 Fourth Quarter revenues were \$4.4M, which set a new quarterly record. This performance indicates that the Company exited the last reporting quarter with demand for its products and services at an all time high.

2. Recent award of \$3.4M contract

As announced May 1, the Company recently received a \$3.4M contract from Hill AFB for delivery and installation of three of its Ling Electronics Model 2016 ElectroDynamic shakers. This prestigious win continues a string of wins for the Company's Ling Electronics unit in the large shaker market.

How will deregistration effect the trading of Qualmark's common stock?

Qualmark will not be required to file documents under the Exchange Act and therefore its stock will not be eligible for listing on the Over the Counter Bulletin Board (OTCBB). In addition, its shareholders will not have the same amount of information regarding Qualmark that they were previously able to access. It remains uncertain what will happen to the trading of Qualmark stock. Qualmark stock is no longer traded on the OTCBB. If brokers elect to do so, it is possible that Qualmark will still be traded by market makers in the future through the Pink Sheets (<http://www.pinksheets.com>). There can be no assurance that any brokerage firms will continue to make a market in Qualmark's common stock.
